

Internet Research

What is the Internet?

The Internet is a lot of computers connected together across the World.

What is the World Wide Web?

- The World Wide Web contains the millions of different websites on the Internet, each containing lots of information.
- To look at information on the web you need a special program called a web browser.
- If you know a page's web address (URL), you can type it into the address bar and go straight to that page.

The World Wide Web is BRILLIANT for finding out information...

✓ You don't need to leave home or school

✓ It is always up-to-date

✓ Web pages can include multimedia
(like sound or videos)

...BUT you must read each web page carefully to make sure it
LOOKS HELPFUL AND GENUINE!
